JIMY

Technical Lead | Backend Engineer

Jakarta, Indonesia | +62 812-7822-7182 | jimy1897@gmail.com | LinkedIn:jimy

SUMMARY

Backend Engineer and Technical Lead with 4+ years of professional experience designing and scaling backend systems across government, financial services, and HRIS platforms. Strong expertise in Node.js, TypeScript, PostgreSQL, and microservices architecture, with hands-on experience in API integration, system design, and database optimization. Proven experience leading engineering teams, owning end-to-end technical decisions, and delivering production-ready backend solutions, including large-scale government data integration initiatives.

WORK EXPERIENCE

Ministry of Home Affairs — Back-end Developer May 2025 – Present | Jakarta

- Designed and developed scalable RESTful APIs and relational database schemas for national-level data integration systems.
- Spearheaded the standardization of API architectures for all regional governments (*Pemerintah Daerah*), unifying data exchange protocols.
- Developed and deployed an automated integration system, eliminating manual onboarding processes for connected platforms.
- Optimized API performance and reliability in SIPD-HUB, supporting high-demand digital public services.
- Contributed to PELITA, enabling efficient data exchange across government platforms.
- Collaborated with cross-functional teams to ensure data consistency, security, and system scalability.

Independent Technical Lead (Back-end) — Freelance (Part-time) Feb 2023 – Jan 2026 | Jakarta

- Led backend architecture and end-to-end development for 5+ freelance projects with teams of 3–6 developers, successfully delivering scalable system designs, API contracts, and optimized data models.
- Acted as the primary technical decision-maker, guiding implementation teams, conducting rigorous code reviews, and ensuring strict architectural consistency.
- Designed and delivered high-performance RESTful APIs and integration layers, focusing on reducing latency, improving maintainability, and ensuring system uptime.

PT Kognitif Skema Indonesia — Back-end Developer Jun 2022 – Mar 2025 | Jakarta

- Managed end-to-end backend development for multiple high-traffic web and mobile applications using Node.js and modern frameworks.
- Designed and implemented scalable architectures and third-party API integrations, ensuring secure and seamless data flows.
- Optimized relational database schemas and complex queries in PostgreSQL/MySQL, significantly improving application response times and data reliability.

PT Kyoai Medical Center — Web Developer Jan 2022 – Jun 2022 | Jakarta

- Maintained and enhanced internal web applications for the E-Registration system, supporting high-volume patient registration and operational workflows.
- Implemented new features and improvements based on functional requirements, ensuring system stability and usability.
- Collaborated with internal stakeholders to troubleshoot issues and deliver timely enhancements.

SKILLS

- Backend: Node.js, Express.js, Adonis.js, REST API, Microservices, JWT Authentication.
- Frontend/Mobile: React Native, React.js, Next.js.
- Database: PostgreSQL, MySQL.
- DevOps : Linux, Nginx, PM2, Docker.
- AI-Assisted Development : OpenAI Codex CLI, Claude Code.
- Tools: Git, GitHub/GitLab, Trello, Postman, Swagger, Firebase.
- Core Competencies: Architecture Design, Performance Optimization, Database Optimization, API Design,Team Leadership.

CERTIFICATIONS

Web Developer — Badan Nasional Sertifikasi Profesi (Oct 2025)

EDUCATION

Bachelor of Information System — STMIK Insan Pembangunan (Sep 2017 – Jun 2021)
